PRODUCTION TEST

Integra Technologies LLC is a leader in providing production test services to semiconductor manufacturers and military / aerospace OEMs. We have the systems, processes and capabilities in place to support an array of production test requirements. Whether you have high-volume testing needs, or low-volume customized test requirements, Integra is the right choice.

Package Test

- Automated handlers to support all package types
- Hot and cold automated testing (-55°C to 150°C)

Custom Test Processing & Flows

- Temperature testing (-75°C to 225°C)
- Serialized data collection
- Characterization data collection
- Endurance and data retention testing

Device Upscreening

- Upscreen commercial devices to military, industrial or avionics grades
- Part procurement + upscreening

Wafer Probe

- 3" to 12" wafers
- Hot chuck probe
- Bumped wafers

Counterfeit Parts Detection

Group A Testing

Burn-In

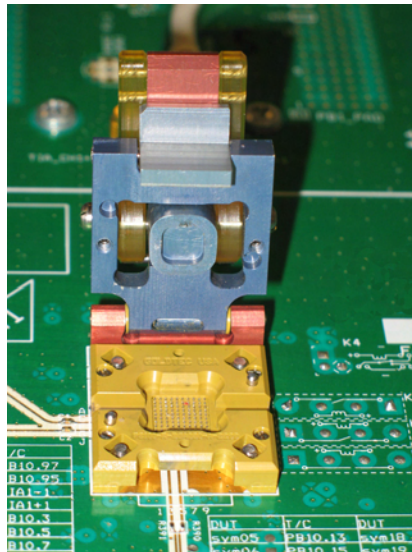

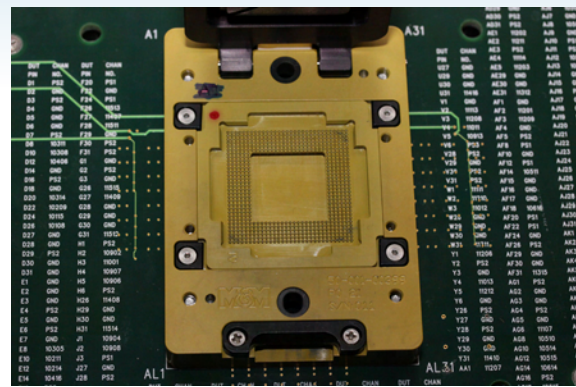

Lead Scan

Tape & Reel

Bake & Dry Pack

Finished Goods Storage & Drop Ship

Assembly & Test Turnkey

Celebrating over 25 years of providing high quality semiconductor test services.
